

DAKS Application Notifier-Pro

Multi Platform-Messaging with **DAKS**: User-friendly – Dependable – Flexible

In our modern work environment, the growing and vast spectrum of communications media and channels frequently confront us with particular demanding challenges – especially when it comes to messages that need to reach many recipients who all use different target media.

DAKS overcomes these obstacles and distributes your messages reliably along different communications channels and media.

Notifier-Pro is a convenient and intuitive messaging user interface. It enables you to use **DAKS** to reach many individual subscribers as well as entire groups of users along various media – with one single message!

Select addressees conveniently

Save time using text templates

Reach many with minimal effort

Apply **DAKS** at any time, anywhere

Individual and easy reachability

Safe internal communication
