- Facade protection, e. g. door and window **contacts**

Package Details

☑ Simple and fast implementation

- Fast integration into existing ITC infrastructures by connecting any PBX system, carrier network, etc., or soft switch via VoIP (4 channels)
- Convenient browser-based installation and multi-language administration (available in German, English, French, Dutch, Turkish)
- Broadcast call activation by telephone, personal emergency signal device, control panel, or host system via data interface

☑ Optionally expandable

- Optionally expandable with additional DAKSeco V2.10 performance features such as contact I/O, callback functionality, and additional VoIP channels

☑ Features

- Up to 100 broadcast call groups each with up to 25 call destinations
- Up to 10 parallel system processes (broadcast calls, conference calls)
- Priority option for broadcast calls and recipients
- Two data interfaces: optionally serial via ESPA 4.4.4 or LAN-based via ESPA-X
- Digital I/O license: 16 IN with short-circuit and line-break detection / 8 OUT
- One integrated special relay output (e.g. for signaling operational readiness)
- Power supply via Power-over-Ethernet (PoE Class 2) or via a separate PoE injector (looped-in power supply) off 100...240VAC
- NTP and SNMP support
