DAKSeco

Typical Areas of Use

Hospital, nursing home:
nurse calls & alarms

Production, commerce:
fault reports & alarms

City councils, schools:
alarms

Hotels, leisure facilities:
service calls & alarms

Silent Alarms with
fire alarm systems

Alarms (also automatic)
from end devices

Messages & alarms from
building technology

Ideal for Digitalizing Analog Business Processes in Many Industries

**Optimal
price/performance
ratio**

- Professional distribution of **alarms and notifications** in daily routine and crisis situations
- **Digitalization** / automation of analog emergency plans
- Optimized **availability** control through time and holiday tables, and more.

**2 ESPA interfaces
1 I/O
contact license**

For the integration of...

- **fire alarm systems**
- **hazard alarm systems**
- **nurse call systems**
- **building technology systems**
- **sensors, etc.**

**Advanced
Workflow-
extension**

First responder scenarios in the event of industrial accidents with...

- ad-hoc emergency conference call when dialing the emergency number
- calling number delivery to conference participants
- configuration of speaking rights

Package Details

☑ Simple and fast implementation

- Fast integration into existing ITC infrastructures by connecting any PBX system, carrier network, etc., or soft switch via VoIP (4 channels)
- Convenient browser-based installation and multi-language administration (German, English, French, Dutch and Turkish)
- Broadcast call activation by telephone, personal emergency signal device, control panel, or host system via data interface

☑ Optionally expandable

- Optionally expandable with additional DAKSeco V2.10 performance features such as contact I/O, callback functionality, and additional VoIP channels

☑ Features

- Up to 100 broadcast call groups each with up to 25 call destinations
- Up to 10 parallel system processes (broadcast calls, conference calls)
- Priority option for broadcast calls, recipients
- Two data interfaces: optionally serial via ESPA 4.4.4 or LAN-based via ESPA-X
- Digital I/O license: 16 IN with short-circuit and line break detection / 8 OUT
- Advanced Workflow extension, e.g. for implementing ad hoc emergency conferences
- One integrated special relay output (e.g. for signaling operational readiness)
- Power supply via Power-over-Ethernet (PoE Class 2) or via a separate PoE injector (looped-in power supply) off 100...240VAC
- NTP and SNMP support

Order Information

Package	Power-over-Ethernet	VoIP	Channels	ESPA 4.4.4 / ESPA-X	Digital I/O	Extras	Order Information
Entry	✓	✓	4 (expandable to 8)	1	-	-	DE21P-1EN4V
Smart	✓	✓	4 (expandable to 8)	2	✓	-	DE21P-1SMART
Business	✓	✓	4 (expandable to 8)	2	✓	Advanced Workflow	DE21P-1BUSI
Zusatzoption							
Update Protection Key		For the activation of recent minor releases bringing smaller product improvements incl. new Linux components through latest security patches					DE21L-UP1J
